

Subject Index to Volume 7

A

- ACE: see Angiotensin-converting enzyme
- Acetylcholine
 endothelium-dependent relaxation, pulmonary circulation, L194
 hydrogen peroxide-induced modulation and, airway smooth muscle, L714
 modulation of cGMP, vascular cells, L113
 release, measurement, trachea (guinea pig), L142
- Actin-gelsolin, binding, endothelial cells, umbilical vein, L664
- Adenosine diphosphate, platelet-released factor, endothelial barrier, L670
- Adenosine monophosphate, cyclic
 apical membrane, cystic fibrosis, airway and intestinal epithelia, L1
 atriopeptin and, increase in endothelial cell permeability, L363
- CFTR channels, airway cells, L692
- control, beat cycle, respiratory tract cilia, L232
- insulin effects, β -adrenergic responses, lung, fetus, L562
- surfactant protein C and, alternative splicing and regulation, fetus, L634
- Adenosine triphosphate
 oxidant injury and, alveolar epithelial cells, L430
 platelet-released factor, endothelial barrier, L670
- Airway
 acetylcholine release, measurement of (guinea pig), L142
 cystic fibrosis, chloride channels in apical membrane, L1
 endothelin-1, regulation of smooth muscle cells, L317
 epithelial cells
 induction of intracellular adhesion molecule-1 by interferon- γ , L79
 neutrophil chemotaxis by tachykinins, L226
 goblet cell secretion, cigarette smoke-induced, L161
 hyperresponsiveness, anti-Mo1 monoclonal antibody effects, L723
 neutrophil accumulation, interleukin-8 effects, L708
 secretion, tracheal gland cells in primary culture, L264
 smooth muscle, hydrogen peroxide modulation of, L714
 surface fluid, filter paper equilibration, L243
 thromboxane-induced proliferation, smooth muscle cells, L555
- Airway cells, CFTR channels in, L692
- Albumin, transendothelial flux, pulmonary artery, IL-1 effects, L128
- Alveolar epithelial cells
 phospholipase activity in, oxidant injury effects, L430
 type II
 aminopeptidase N expression, during development, L460
 binding of surfactant protein B, L333

- distribution of liposome-entrapped antioxidant enzymes, L585
- hydrophobic proteoglycan synthesis, L348
- processing of surfactant protein B by cathepsin D-like protease, L95
- surfactant-associated proteins in, L479
- Alveoli
 formation, postnatal effects of prenatal dexamethasone, L37
 surfactant turnover, lamellar bodies, L607
- Amiloride, sodium- and chloride-conductive pathways, tracheal epithelium, L519
- 1-Aminobenzotriazole, cytochrome P-450 and, hypoxic pulmonary vasoconstriction, L446
- Aminopeptidase N, expression, lung development, fetus, L460
- Angiotensin-converting enzyme, stimulation by dexamethasone, pulmonary artery endothelial cells, L645
- Antioxidant enzymes
 gene regulation, lung, L466
 glutathione S-transferase, immunolocalization, lung, L679
 liposome-entrapped, alveolar distribution of, L585
 lung injury induced by, food restriction effects, prematurity (guinea pig), L357
- Arachidonic acid, activity, mast cell granules, L168
- L-Arginine, chronic hypoxic pulmonary hypertension and, L194
- Asbestos
 lung development, response to injury and, L308
 lung inflammation induced by, surface complexed iron in, L511
- Asthma
 endothelin-1 regulation, airway smooth muscle cells, L317
 thromboxane-induced proliferation, airway smooth muscle cells, L555
- Atrial natriuretic peptides, cGMP levels and, increase in endothelial cell permeability, L363
- Atriopeptin, cGMP levels and, increase in endothelial cell permeability, L363
- Atriopeptin II, modulation of cGMP, vascular cells, L113

B

- Bronchi, responsiveness, hydrogen peroxide effects, L402
- Bronchoalveolar lavage
 air- and fluid-filled, urea exchange in, L619
 epithelial lining, lung, L617
- Bronchopulmonary dysplasia, oxygen inactivation of fibroblast growth factors, endothelial cell proliferation and, L370

C

- C5a, superoxide responses to, endothelial cells, L51

Calcium

- control, beat cycle, respiratory tract cilia, L232
- cytosolic, thrombin-induced increase in endothelial permeability, L219
- influx, stretching effects, pulmonary arterial smooth muscle cells, L602
- superoxide responses to C5a and TNF- α , endothelial cells, L51
- Calcium channel, pulmonary artery relaxation mediated by, chronic hypoxia effects, L88
- Calcium channel blocker, hypoxic contraction, pulmonary arterial, L73
- Calcium ionophores, activity, mast cell granules, L168
- Calcium ions, intracellular, transport across Clara cells, L122
- Calcium transients, thrombin receptor peptide binds to, L595
- cAMP: see Adenosine monophosphate, cyclic
- Candida albicans*, sepsis, TNF- α production during, L526
- Catalase
 gene regulation, lung, L466
 glutathione S-transferase, immunolocalization, lung, L679
 mechanism, modulation of airway smooth muscle, L714
- Cathepsin D-like protease, processing of surfactant protein B proprotein by, L95
- Cathepsin G, generation of neutrophil-activating peptide-2 by, L249
- CFTR: see Cystic fibrosis, transmembrane regulator protein,
- cGMP: see Guanosine monophosphate, cyclic
- Chloramphenicol, cytochrome P-450 and, hypoxic pulmonary vasoconstriction, L446
- Chloride
 conductive pathways, tracheal epithelium, L519
 secretion, ion transport, Clara cells, L122
- Chloride channels
 apical membrane, cystic fibrosis, airway and intestinal epithelia, L1
 α -toxin permeabilizes basolateral membrane, T84 cells, L104
- Cholinergic nerves, goblet cell secretion, cigarette smoke-induced, L161
- Chromatography, high-performance liquid, acetylcholine release, trachea (guinea pig), L142
- Cigarette smoking
 bioactive interleukin-6 secretion and, alveolar macrophages, L471
 goblet cell secretion induced by, airway, L161
 tobacco, mast cell mediators and, L67
- Circulation
 perinatal pulmonary, endothelin-1 (sheep), L15
 pulmonary
 endothelium-dependent relaxation in, L-arginine and, L194

- Circulation (*continued*)
 methylene blue effects, L575
- Clara cells
 intracellular calcium ion transport, L122
 surfactant protein D in, L60
- Colchicine, activity, mast cell granules, L168
- Collagen, differential production, lung fibroblast subpopulations, L283
- Colony-stimulating factors, lung growth, origin and lineage of macrophages, L299
- Cyclooxygenase
 activity, mast cell granules, L168
 circulation and, intrapulmonary arteries and veins (sheep), L15
 mast cell mediation, tobacco smoke effects, L67
 respiratory epithelium, smooth muscle interaction, L137
- Cyclophosphamide, immunosuppression induced by, TNF- α production during sepsis, L526
- Cystic fibrosis
 chloride channels, apical membrane, airway and intestinal epithelia, L1
 neutrophil accumulation, interleukin-8 effects, airway, L708
 sodium- and chloride-conductive pathways, tracheal epithelium, L519
 transmembrane regulator protein airway cells, L692
 tracheal epithelium, L519
- Cytochrome P-450, lung, hypoxic pulmonary vasoconstriction and, L446
- Cytokines
 albumin flux and, pulmonary artery transendothelial, L128
 bioactive secretion, cigarette smoking effects, L471
 enhancement, oxygen tolerance, L22
 fibrin turnover and, fibroblasts, L487
 increased endothelial permeability induced by, extracellular matrix effects, L627
 intrapulmonary production, during *Canidia* sepsis, L526
 neutrophil accumulation and, trachea, L708
- D**
- Development: *see also* Growth; Maturation lung
 aminopeptidase N expression, fetus, L460
 insulin effects, fetus, L562
 mechanical stretch effects, fetus, L376
 oxygen effect on endothelial cell proliferation, L370
 postnatal effects of prenatal dexamethasone, L37
 response to injury, L308
 TGF- β effects on elastin, L257
- Dexamethasone, prenatal, postnatal effects on alveoli formation, L37
- Diacylglycerol, phosphatidylcholine hydrolysis, type II pneumocytes, L42
- Dipalmitoylphosphatidylcholine adsorption and surface sorting, L210
 clearance, alveolar, lung cells, L201
- E**
- Ectoenzymes
 aortic endothelial, PMA-activated neutrophil effects, L657

- pulmonary endothelial, PMA-activated neutrophil effects, L650
- Ectoepitidase, expression, lung development, fetus, L460
- EDRF: *see* Endothelium-derived relaxing factor
- Eicosanoids
 endothelin-1 and, airway smooth muscle cells, L317
 proliferation induced by, airway smooth muscle cells, L555
 release, growth oxygen level effects, lung cells, L454
- Elastin, TGF- β influence on, lung fibroblasts and aortic smooth muscle cells, L257
- Elastogenesis, IGF-I regulation of, aortic and lung cells, L276
- Endothelial barrier, enhancement, platelet-released factor and, L670
- Endothelial cells
 aortic, PMA-activated neutrophil effects on ectoenzyme activities, L657
 eicosanoid release, growth oxygen effects, L454
 permeability: *see* Permeability, proliferation, oxygen effects, L370
 pulmonary artery, dexamethasone stimulation of ACE, L645
 superoxide responses, C5a and TNF- α , L51
 thrombin receptor peptide binds to, L595
 umbilical vein, histamine, actin-gelsolin binding, and polyphosphoinositides in, L664
- Endothelin-1
 circulation and, intrapulmonary arteries and veins (sheep), L15
 regulation, airway smooth muscle cells, L317
- Endothelium-derived relaxing factor
 circulation and, intrapulmonary arteries and veins (sheep), L15
 methylene blue effects, pulmonary vascular bed, L575
 release, endothelial cGMP and, L113
- Epithelial cells
 airway, induction of intracellular adhesion molecule-1 by interferon- γ , L79
 alveolar type II, processing of surfactant protein B by cathepsin D-like protease, L95
 bronchial, neutrophil chemotaxis by tachykinins, L226
 bronchiolar, intracellular calcium ion transport, L122
 nonciliated bronchiolar, surfactant protein D in, L60
 renal, restricted diffusion of macromolecules, L27
 respiratory, tracheal smooth muscle-constricting factor released by, L137
- Extracellular matrix
 alveolar type II cell interaction, hydrophobic proteoglycans, L348
 TNF- α -induced increase in endothelial permeability and, L627

F

- Fasting, hyperoxia-induced lung injury and, prematurity (guinea pig), L357
- Feeding, food restriction, hyperoxia-induced lung injury and, prematurity (guinea pig), L357

- Fetus
 glycosaminoglycan synthesis, PDGF effects, lung cells, L495
 insulin effects, β -adrenergic responses in lung cultures, L562
 lung cell proliferation, mechanical stretch effects, L376
 lung development
 aminopeptidase N expression in, L460
 origin and lineage of macrophages, L299
 surfactant protein C, alternative splicing and regulation, lung, L634
- Fibrin, turnover, cytokines and, fibroblasts, L487
- Fibrinolysis, cytokines and, fibroblasts, L487
- Fibroblast growth factors, oxygen inactivation of, endothelial cell proliferation and, L370
- Fibroblasts
 fibrin turnover, cytokines and, L487
 glycosaminoglycan synthesis, PDGF effects, fetus, L495
 lung, spontaneous production of PDGF, L185
 pulmonary, monocyte chemotactic peptide derived from, L536
- Fibronectin
 differential production, lung fibroblast subpopulations, L283
 extracellular permeability to, extracellular matrix effects, L627
- Filters, small-pore, restricted diffusion of macromolecules, L27
- Fluid, airway, filter paper equilibration, L243

G

- Gadolinium, calcium influx and, pulmonary arterial smooth muscle cells, L602
- Gas, exchange, postnatal effects of prenatal dexamethasone, L37
- Genes, pulmonary, cloning, L546
- Gene expression, surfactant, pulmonary, cloning, L546
- Gene regulation, antioxidant enzyme, lung, L466
- Glucocorticoids, surfactant protein C and, alternative splicing and regulation, fetus, L634
- Glucose, transport, pathways for, type II pneumocytes, adult lung (guinea pig), L612
- Glutathione, lung injury induced by, food restriction effects, prematurity (guinea pig), L357
- Glutathione peroxidase
 gene regulation, lung, L466
 glutathione S-transferase, immunolocalization, lung, L679
- Glutathione S-transferase, antioxidant enzymes and isozymes from, immunolocalization, lung, L679
- Glycoproteins, mucous, tracheal gland cells in primary culture, L264
- Glycosaminoglycan, synthesis, PDGF effects, lung cells, fetus, L495
- Goblet cells, secretion, cigarette smoke-induced, airway, L161
- Growth: *see also* Development; Maturation lung, origin and lineage of macrophages, L299

- oxygen effects, eicosanoid release and, lung endothelial cells, L454
- Guanosine monophosphate, cyclic atriopeptin and, increase in endothelial cell permeability, L363
- endothelial, release of EDRF and, L113
- methylene blue effects, pulmonary vascular bed, L575
- pulmonary artery relaxation mediated by, chronic hypoxia effects, L325
- Guanylate cyclase, modulation of cGMP, vascular cells, L113
- Guanylyl cyclase, pulmonary artery relaxation mediated by, chronic hypoxia effects, L325

H

- Hematopoiesis, lung growth, origin and lineage of macrophages, L299
- Histamine
 - endothelial cells, umbilical vein, L664
 - mast cell mediation, tobacco smoke effects, L67
- Hydrogen peroxide
 - bronchial response and, L402
 - mechanism, modulation of airway smooth muscle, L714
 - phospholipase activity and, alveolar epithelial cells, L430
- Hydrophobic proteoglycans, synthesis, alveolar type II cells, L348
- Hyperoxia
 - lung injury induced by, food restriction effects, prematurity (guinea pig), L357
 - oxygen inactivation of fibroblast growth factors, endothelial cell proliferation and, L370
 - surfactant proteins and lipids during, L291
- Hyperplasia
 - smooth muscle
 - endothelin-1 and, airway, L317
 - thromboxane and, airway, L555
- Hypertension
 - chronic hypoxic pulmonary, endothelium-dependent relaxation in, L-arginine and, L194
 - pulmonary, endothelin-1 and (sheep), L15
 - pulmonary artery relaxation, hypoxia and, L88
- Hypoxia
 - chronic, soluble guanylyl cyclase-mediated pulmonary arterial relaxation and, L325
 - contractile responses and pulmonary artery, L73
 - pulmonary artery smooth muscle cells, L384
 - eicosanoid release during, growth oxygen level effects, lung cells, L454
 - pulmonary artery relaxation and, calcium and potassium channel-mediated, L88

I

- IL-1: *see* Interleukin-1
- IL-6: *see* Interleukin-6
- Indomethacin
 - hydrogen peroxide and airway smooth muscle, L714
 - bronchial responsiveness, L402

- Inositol 1,3,4-trisphosphate, endothelial permeability, thrombin-induced increase in, L219
- Inositol 1,4,5-trisphosphate
 - endothelin-1 and, airway smooth muscle cells, L317
 - receptor binding, maturation of, tracheal smooth muscle, L501
- Insulin, β -adrenergic responses and, lung, fetus, L562
- Insulin-like growth factor-I, regulation of elastogenesis, aortic and lung cells, L276
- Interferon- γ , induction of intracellular adhesion molecule-1, airway epithelial cells, L79
- Interleukin-1
 - albumin flux and, pulmonary artery transendothelial, L128
 - superoxide dismutase and, oxygen tolerance, L342
 - superoxide dismutase mRNA increase induced by, interleukin-6 effects, L22
- Interleukin-1 β
 - induction of intracellular adhesion molecule-1, airway epithelial cells, L79
 - pulmonary fibroblast-derived, expression and regulation of, L536
- Interleukin-6
 - bioactive secretion, cigarette smoking effects, L471
 - enhancement, oxygen tolerance, L22
- Interleukin-8, neutrophil accumulation and, trachea, L708
- Intestine
 - epithelia, cystic fibrosis, chloride channels in apical membrane, L1
 - ischemia-reperfusion, lung neutrophil sequestration after, oxygen radicals and, L394
- Intracellular adhesion molecule-1, selective induction of, interferon- γ , airway epithelial cells, L79
- Ionomycin
 - control, beat cycle, respiratory tract cilia, L232
 - intracellular calcium ion transport, Clara cells, L122
- Ionophore A23187, endothelium-dependent relaxation, pulmonary circulation, L194
- Iron, surface complexed, oxidant generation and lung inflammation, silicate-induced, L511
- Isocitrate, respiratory activities supported by, oxygen exposure effects, lung mitochondria, L439
- Isozymes, glutathione S-transferase, immunolocalization, lung, L679

K

- α -Ketoglutarate, respiratory activities supported by, oxygen exposure effects, lung mitochondria, L439

L

- Lamellar bodies, surfactant protein C recycled to alveoli, L607
- Lectins, lung growth, origin and lineage of macrophages, L299
- Leukocytes, polymorphonuclear, adherence, airway epithelial cells, L79

- Lipids, surfactant proteins and, during hyperoxia, L291
- Lipopolysaccharides, pulmonary fibroblast-derived, expression and regulation of, L536
- Lung
 - β -adrenergic responses, insulin effects, fetus, L562
 - air- and fluid-filled, urea exchange in, L619
 - aminopeptidase N expression, fetus, L460
 - antioxidant enzyme, gene regulation, L466
 - bronchiolar epithelial cells, surfactant protein D in, L60
 - cytochrome P-450, hypoxic pulmonary vasoconstriction and, L446
 - development: *see* Development; Growth, epithelial lining, fluid, L617
 - fibroblasts
 - differential production of collagen and fibronectin, L283
 - IGF-I regulation of elastogenesis, L276
 - spontaneous production of PDGF, L185
 - TGF- β effects on elastin, L257
 - glucose transport pathways, type II pneumocytes (guinea pig), L612
 - hyperoxia-induced injury, food restriction effects, prematurity (guinea pig), L357
 - immunolocalization of antioxidant enzymes and isozymes, from glutathione S-transferase, L679
 - inflammation, silicate-induced, surface complexed iron in, L511
 - injury, IL-1 effects, albumin flux, L128
 - mitochondria, respiratory activity in oxygen exposure, L439
 - processing of surfactant protein B, cathepsin D-like protease, L95
 - surfactant protein B, alveolar type II cells, L333
 - surfactant protein C, alternative splicing and regulation, fetus, L634
 - surfactant SP-A gene, cloning, sequence, and transcription, L546
- Lung cells
 - glycosaminoglycan synthesis, PDGF effects, fetus, L495
 - hydrophobic proteoglycan synthesis, multiple core proteins with, L348
 - proliferation, mechanical stretch effects, fetus, L376
 - surfactant clearance, alveolar, L201

M

- Macromolecules, restricted diffusion, monolayers and small-pore filters, L27
- Macrophages
 - alveolar
 - interleukin-6 secretion, cigarette smoking effects, L471
 - origin and lineage, L299
 - surfactant clearance, L201
- Mast cells
 - granules, cyclooxygenase activity in, L168
 - mediators, tobacco smoke effects, L67
- Maturation: *see also* Development; Growth
 - inositol 1,4,5-trisphosphate receptor binding, tracheal smooth muscle, L501

Membrane, apical, airway and intestinal epithelia, chloride channels in, L1
 Methylene blue, neurogenic cholinergic vasodilator responses, pulmonary vascular bed, L575
 Metyrapone, cytochrome P-450 and, hypoxic pulmonary vasoconstriction, L446
 Microscopy, electron, pulmonary surfactant protein B, endosomal/lysosomal compartment, L479
 Mitogenesis, endothelin-1-induced, airway smooth muscle cells, L317
 Monoclonal antibodies, anti-Mo1, airway hyperresponsiveness and, L723
 Monolayers, small-pore filters and, restricted diffusion of macromolecules, L27
 Mucins, pulmonary disease and, L413
 Muscle, smooth
 airway
 hydrogen peroxide effects on responsiveness, L402
 hydrogen peroxide modulation of, L714
 measurement of acetylcholine release (guinea pig), L142
 calcium and potassium channel-mediated relaxation, pulmonary artery, chronic hypoxia effects, L88
 tracheal
 maturation of 1,4,5-trisphosphate receptor binding, L501
 respiratory epithelium interaction, L137
 Muscle cells
 aortic smooth
 IGF-1 regulation of elastogenesis, L276
 TGF- β effects on elastin, L257
 smooth
 airway, endothelin-1 regulation of, L317
 airway, thromboxane-induced proliferation of, L555
 modulation of cGMP in, L113
 pulmonary arterial, stretching effects on calcium influx, L602
 pulmonary artery, contractile responses of, L384

N

Neurokinin A, neutrophil chemotactic activity, bronchial epithelial cells, L226
 Neutrophil-activating peptide-2, generation, cathepsin G and cathepsin G-treated platelets, L249
 Neutrophils
 accumulation, interleukin-8 effects, trachea, L708
 chemotaxis, bronchial epithelial cells, L226
 PMA-activated
 aortic endothelial ectoenzyme activities, L657
 pulmonary endothelial ectoenzyme activities, L650
 sequestration, lung, circulating xanthine oxidase effects, L394
 Nitrocysteine, modulation of cGMP, vascular cells, L113
 Nitrogen dioxide, exposure, impairment of surfactant protein A after, L177

O

Oligosaccharides, mucin, pulmonary disease, L413
 Oxidants, generation, silicate-induced, surface complexed iron in, L511
 Oxidant injury, phospholipase activity and, alveolar epithelial cells, L430
 Oxygen
 endothelial cell proliferation and, L370
 exposure, respiratory activity in lung mitochondria and, L439
 growth level, eicosanoid release and, lung endothelial cells, L454
 tolerance
 interleukin-6 enhancement of, L22
 superoxide dismutase and interleukin-1 in, L342
 toxicity, surfactant proteins and lipids during, L291
 Oxygen radicals
 circulating, lung neutrophil sequestration and, L394
 lung inflammation induced by, surface complexed iron in, L511
 Ozone, inflammation induced by, airway, anti-Mo1 monoclonal antibody effects, L723

P

Palmitoylation, surfactant protein C, properties and metabolism, L151
 Peptides
 monocyte chemotactic, pulmonary fibroblast-derived, L536
 thrombin receptor, binding to endothelial cells and calcium transients, L595
 Permeability
 endothelial
 thrombin-induced increase, L219
 TNF- α -induced, extracellular matrix effects, L627
 endothelial cells, cGMP and atriopeptin effects, L363
 paracellular, platelet-released factor, endothelial barrier, L670
 vascular, IL-1 effects, albumin flux, L128
 Pertussis toxin, responses to C5a and TNF- α , endothelial cells, L51
 Phlorizin, binding, glucose transport, type II pneumocytes (guinea pig), L612
 Phorbol esters, neutrophils activated by, pulmonary endothelial ectoenzyme activities, lungs, L650
 Phorbol 12-myristate 13-acetate
 neutrophils activated by
 ectoenzyme activities, aortic endothelial cells, L657
 pulmonary endothelial ectoenzyme activities, lungs, L650
 Phosphatidic acid, phosphatidylcholine hydrolysis, type II pneumocytes, L42
 Phosphatidylcholine, hydrolysis, type II pneumocytes, L42
 Phospholipase, activity, oxidant injury effects, alveolar epithelial cells, L430
 Phospholipase A₂, thromboxane-induced cell proliferation and, airway, L555
 Phospholipase C
 endothelin-1 and, airway smooth muscle cells, L317
 phosphatidylcholine hydrolysis, type II pneumocytes, L42
 thromboxane-induced cell proliferation and, airway, L555
 Phospholipid lysosomes, binding, alveolar type II cells, L333
 Platelet-derived growth factor
 differential effects, glycosaminoglycan synthesis, lung cells, fetus, L495
 spontaneous production of, lung fibroblasts, L185
 Platelet-released factor, endothelial barrier and, L670
 PMA: see Phorbol 12-myristate 13-acetate
 Pneumocytes
 type II
 glucose transport pathways, adult lung (guinea pig), L612
 impairment of surfactant protein A after nitrogen oxide exposure, L177
 phosphatidylcholine hydrolysis, L42
 Polyphosphoinositides, endothelial cells, umbilical vein, L664
 Potassium channels, pulmonary artery relaxation mediated by, chronic hypoxia effects, L88
 Prematurity, hyperoxia-induced lung injury, food restriction effects (guinea pig), L357
 Prostaglandins
 activity, mast cell granules, L168
 production, modulation by tobacco smoke, L67
 release, growth oxygen level effects, lung cells, L454
 respiratory epithelium, smooth muscle interaction, L137
 Prostaglandin E₂, hydrogen peroxide and, bronchial responsiveness, L402
 Prostaglandin I₂, hydrogen peroxide and, bronchial responsiveness, L402
 Protein genes, mucin, pulmonary disease, L413
 Protein kinase C, hypoxic contraction, pulmonary arterial, L73
 Proteins, surfactant-associated, endosomal/lysosomal compartment, L479
 Pulmonary artery
 calcium and potassium channel-mediated relaxation, chronic hypoxia effects, L88
 endothelial cell, restricted diffusion of macromolecules, L27
 hypoxic contraction, L73
 relaxation, guanylyl cyclase-mediated, chronic hypoxia effects, L325
 smooth muscle cells, contractile responses of, L384
 stimulation of ACE, dexamethasone and, endothelial cells, L645
 transendothelial albumin flux, IL-1 effects, L128
 Pulmonary disease, mucins in, L413
 Pulmonary epithelium
 air- and fluid-filled, urea exchange in, L619
 fluid, quantitative assessment, L617
 Pulmonary fibrosis
 collagen and fibronectin production, fibroblast subpopulations, L283
 PDGF production, fibroblasts, L185
 Pulmonary vascular bed, methylene blue effects, neurogenic cholinergic vasodilator responses, L575
 Pulmonary veins, endothelin-1 effects (sheep), L15

R

- Receptors
 - adrenergic, pulmonary artery smooth muscle cells, L384
 - β -adrenoceptors, insulin effects, lung, fetus, L562
 - muscarinic, acetylcholine release, trachea (guinea pig), L142
- Resistance, pulmonary vascular, PMA-activated neutrophils in ectoenzyme activities, L650
- Respiration, after oxygen exposure, lung mitochondria, L439
- Respiratory distress syndrome
 - adult
 - cathepsin G and, L249
 - circulating xanthine oxidase and neutrophil sequestration, L394
 - IL-1 effects, albumin flux, L128
 - surfactant proteins and lipids during, L291
- Respiratory tract, beat cycle, control by calcium and cAMP, L232
- RU 38486, ACE activity and, pulmonary artery endothelial cells, L645

S

- Secretory granules, surfactant protein D, bronchiolar epithelial cells, L60
- Sensory nerves, goblet cell secretion, cigarette smoke-induced, L161
- Sepsis, *Candida*, TNF- α production during, L526
- Serotonin, platelet-released factor, endothelial barrier, L670
- Sex differences, prenatal dexamethasone, postnatal effects on alveoli formation, L37
- Silicate, lung inflammation induced by, surface complexed iron in, L511
- Sodium, conductive pathways, tracheal epithelium, L519
- Sodium nitroprusside, modulation of cGMP, vascular cells, L113
- Staphylococcus aureus*, basolateral membrane and, chloride-secreting epithelium, T84 cells, L104
- Starvation: see Fasting
- Stretch
 - calcium influx and, pulmonary arterial smooth muscle cells, L602
 - mechanical, lung cell growth and, L376
- Substance P, neutrophil chemotactic activity, bronchial epithelial cells, L226
- Succinate, respiratory activities supported by, oxygen exposure effects, lung mitochondria, L439
- Superoxide
 - circulating, lung neutrophil sequestration and, L394
 - endothelial cells, C5a and TNF- α , L51
- Superoxide dismutase
 - gene regulation, lung, L466
 - glutathione S-transferase, immunolocalization, lung, L679

- liposome-entrapped, alveolar distribution of, L585
- mRNA levels, TNF- α - and IL-1-induced increase in, IL-6 effects, L22
- pulmonary, kinetics in oxygen intolerance, L342
- Surfactants, clearance, alveolar, lung cells, L201
- Surfactant protein A
 - adsorption and surface sorting, lipid extract surfactant, L210
 - lipids and, during hyperoxia, L291
 - structural and functional impairment, nitrogen dioxide exposure, L177
- Surfactant protein B
 - binding and uptake, alveolar type II cells, L333
 - lipids and, during hyperoxia, L291
 - processing of, cathepsin D-like protease, L95
 - pulmonary, endosomal/lysosomal compartment, L479
- Surfactant protein C
 - alternative splicing and regulation, L634
 - lipids and, during hyperoxia, L291
 - properties and metabolism, L151
 - recycling, alveoli to lamellar bodies, L607
- Surfactant protein D, subcellular localization, bronchiolar epithelial cells, L60
- Surfactant protein gene, pulmonary, cloning, sequence, and transcription, L546

T

- Tachykinins, neutrophil chemotaxis by, bronchial epithelial cells, L226
- T84 cells, chloride-secreting epithelium, α -toxin permeabilizes basolateral membrane, L104
- TGF- β : see Transforming growth factor- β
- Thrombin
 - increase induced by, endothelial permeability, L219
 - receptor peptide, endothelial cells and calcium transients, L595
- Thromboxane
 - proliferation induced by, airway smooth muscle cells, L555
 - respiratory epithelium, smooth muscle interaction, L137
- Thromboxane A₂, circulation and, intrapulmonary arteries and veins (sheep), L15
- TNF- α : see Tumor necrosis factor- α
- Toxicology, nitrogen dioxide, impairment of surfactant protein A after, L177
- α -Toxin, basolateral membrane and, T84 cells, L104
- Trachea
 - acetylcholine release, measurement of (guinea pig), L142
 - epithelium, tracheal gland cells in primary culture, L264
 - neutrophil accumulation, interleukin-8 effects, L708

- smooth muscle, maturation of 1,4,5-trisphosphate receptor binding, L501
- smooth muscle-contracting factor, respiratory epithelial cells, L137
- Tracheal epithelium, sodium- and chloride-conductive pathways, L519
- Tracheal gland, cell in primary culture, L264
- Transforming growth factor- α , fibrin turnover and, fibroblasts, L487
- Transforming growth factor- β , elastin and, lung fibroblasts and aortic smooth muscle cells, L257
- 1,4,5-Trisphosphate, thromboxane-induced cell proliferation and, airway, L555
- D-myo 1,4,5-Trisphosphate, superoxide responses to, endothelial cells, L51
- Tryptase, mast cell mediation, tobacco smoke effects, L67
- Tumor necrosis factor, pulmonary fibroblast-derived, expression and regulation of, L536
- Tumor necrosis factor- α
 - fibrin turnover and, fibroblasts, L487
 - increased endothelial permeability induced by, extracellular matrix effects, L627
 - induction of intracellular adhesion molecule-1, airway epithelial cells, L79
 - intrapulmonary production, during *Candida* sepsis, L526
 - superoxide dismutase mRNA increase induced by, interleukin-6 effects, L22
 - superoxide responses to, endothelial cells, L51

U

- Undernutrition: see Fasting; Feeding
- Urea
 - epithelial lining, lung, L617
 - exchange, air-filled and fluid-filled lungs, L619

V

- Vasoconstriction
 - eicosanoid release during hypoxia, growth oxygen level effects, lung cells, L454
 - hypoxic pulmonary, cytochrome P-450 and, L446
 - pulmonary hypoxic, signal transduction, L73
- Vasodilation, cholinergic, methylene blue effects, pulmonary vascular bed, L575
- Vasodilator responses, neurogenic cholinergic, methylene blue effects, pulmonary vascular bed, L575
- Verapamil, calcium influx and, pulmonary arterial smooth muscle cells, L602

X

- Xanthine oxidase, circulating, lung neutrophil sequestration and, L394
